

StorEdge[®] Solutions - Enabling Energy Independence

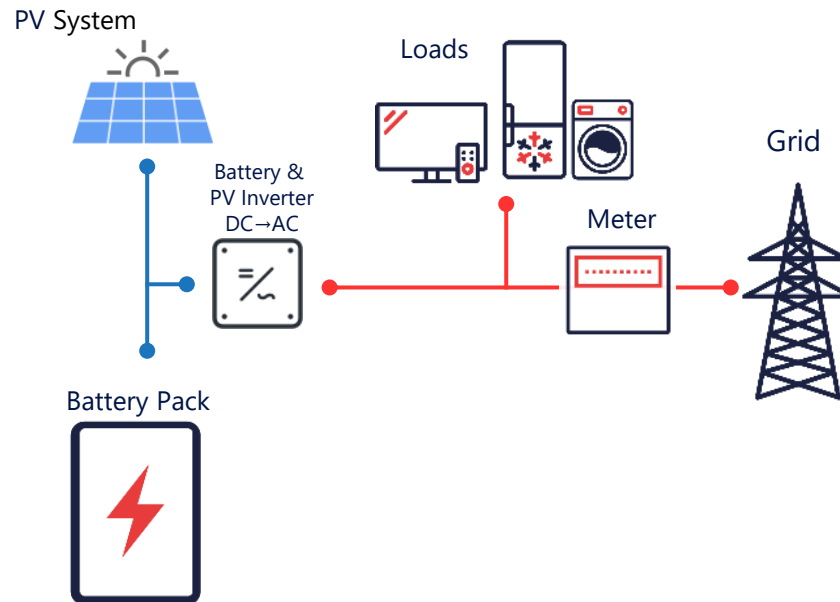

5/9/2020

solar**edge**

More Energy

- DC coupled battery solution allows high system efficiency
- PV power is stored directly in the battery
- No additional conversions from AC to DC and back to AC

PV System DC-Coupled Storage

Simple Design & Installation

- ▀ A single inverter for both on-grid PV and battery management
- ▀ No special wires required → utilizes standard PV cables
- ▀ No high voltage or current during installation and maintenance
- ▀ Modular solution allows easy scalability

Enhanced Safety

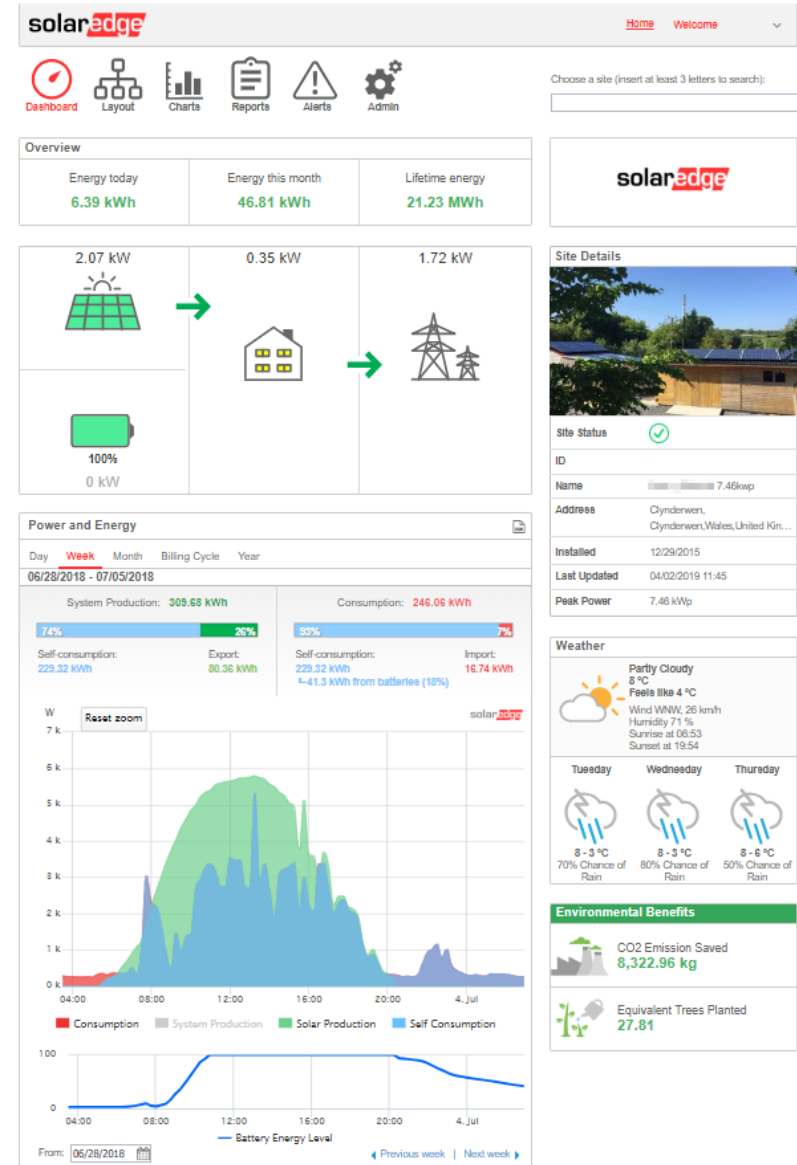

- PV array and battery voltage reduced to a safe voltage automatically upon AC shut down
- No high voltage or current during installation and maintenance
- Complies with VDE 2100-712
- External rapid shutdown

Full Visibility

The SolarEdge monitoring platform enables:

- Visibility of battery status, PV production and self-consumption data in a single dashboard
- Remote diagnostics
- Remote firmware upgrades to both inverter & battery
- Alerts on system issues

Thank You!

Cautionary Note Regarding Market Data & Industry Forecasts

This power point presentation contains market data and industry forecasts from certain third-party sources. This information is based on industry surveys and the preparer's expertise in the industry and there can be no assurance that any such market data is accurate or that any such industry forecasts will be achieved. Although we have not independently verified the accuracy of such market data and industry forecasts, we believe that the market data is reliable and that the industry forecasts are reasonable.
